

## Surprise task b: Making your own Frisbee from fabric

### What you need:

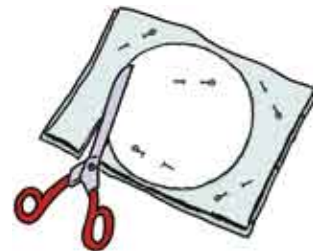

- a piece of A3 paper ■ 2 pieces of fabric of about 30 cm<sup>2</sup> ■ compasses
- scissors ■ pins ■ 80 cm of *lead ribbon* ■ a safety pin ■ thread
- a sewing machine

1 Draw a circle with a *diameter* of 26 cm on your piece of A3 paper.

2 Cut the circle out.

3 Take the two pieces of fabric. Put them on top of each other, so that the colourful sides face each other.

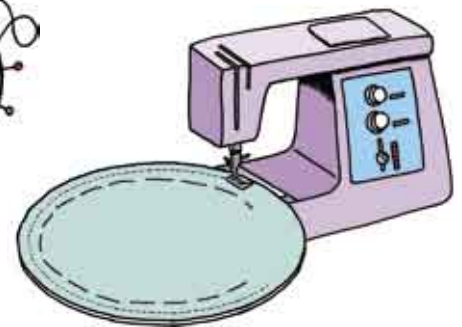

4 Pin the paper circle onto the fabric.

5 Cut out the circle. Remove the paper circle.

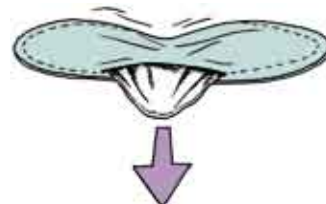

6 Pin the circles of fabric together and *tack* them.

7 *Stitch* the two pieces of fabric together about 1 cm from the *edge*. Leave a small opening.

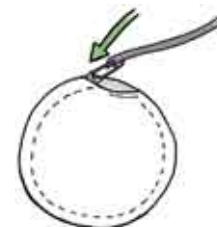

8 Turn the fabric inside out so that the colourful side is now facing outwards.

9 Tack around the edges.

10 *Stitch* the fabric about 1 cm from the edge so that you have  *piping* one centimetre wide running around the edge of the fabric. Leave a small opening.

11 *Thread* the lead ribbon with the help of the safety pin through the piping in the material.

12 Sew the small opening together so that it is closed. Your Frisbee is ready to use!
